## TEC's Educational Discount Program

### *Train with the best performance testing tools on the market*

Our Educational Discount Program makes it easy for approved building performance training organizations to teach using the industry leading testing tools from TEC. This program applies to vocational schools, universities, colleges and private training organizations offering building performance training programs in building and duct airtightness testing, HVAC diagnostics and other related topics.

The Educational Discount Program\* offers 30% off all TEC manufactured equipment, including the Minneapolis Blower Door™ and Duct Blaster®, TrueFlow® Air Handler Flow Meter, Exhaust Fan Flow Meter, DG-1000 and DG-700 pressure gauges, TEC WiFi Link, and the TEC Trainer™ Airtightness Training Simulator.

TEC's goal is to provide the most advanced, accurate, flexible and affordable testing equipment in the building performance testing industry. Don't settle for less than the best in your training program.

### **Training and Support**

TEC is renowned for its technical support. Our technical support is second-to-none as our staff has a combined 40 years of field experience. We will be there to help you and your students during the training process. Our equipment comes with the necessary software, free of charge, for conducting air leakage tests. You can count on TEC technical support to help you with equipment setup, operation, software questions and more.

### **Software**

TEC offers several free software programs to help you in the field, and also to help you train your students, whether connected by cables or wirelessly. In addition to TECTITE, TECLOG3 and TECBLAST for air leakage tests, we also have a variety of Windows-based simulation programs, and mobile apps for both iOS and Android devices.

### **How to Participate**

To receive the education discount your organization must show that you are providing instruction to your students that cover building envelope leakage and testing, duct leakage and testing and/or flow measurement of air handlers and forced air systems. A copy of your syllabus, course curricula or other teaching material needs to be forwarded to TEC before receiving the discount.

\* Discount is only available to approved training/educational programs. Training/educational programs are not authorized to resell products that were purchased with this discount.
